Ippera food & grocery delivery

2020 - 2021

- Social Media and Online Networking
- Worked alongside marketing specialists, a copywriter and graphic designers to create landing page that best matched search intent driving up conversion rates by 20% on average.

## PROJECTS

### GoQRide (QR Based Ticket Booking System for Public Transport)

GoQRide is a paperless and self-ticket booking system with a unique bus QR code for every bus. With this system, users can book their tickets by scanning the QR code and conductors can track the number of passengers travelling in the bus. The Benefit for the bus owners is that they can monitor the bus's performance, collection, and number of passengers instantly.

### Phishguard (website for checking fake news and phishing website using ML)

A website dedicated to checking fake news and phishing links helps users verify the credibility of news sources and identify potential online threats swiftly. Through advanced algorithms and user input, it assesses the authenticity of URLs and news articles, aiding in promoting digital literacy and safeguarding against misinformation and cyber threats.
